

New Year New Inventory!

As we begin 2021, it's a time to start anew. This also means new IT hardware will be introduced to the market. At Performance by Design, we make sure to keep up with the industry standard of hardware.

Apple has introduced a new MacBook Pro with the new Apple designed processor chip. This new model is for the 13.3" model of Apple MacBook. We will carry the model with 8GB of RAM and 256GB Solid State Drive. As this being a new model device, not all software is compatible with this model yet. If needed, we can provide the previous model for your veteran to ensure their software will work.

As new hardware will be releasing over the year, Performance by Design will update our inventory and Catalog with these new devices. New devices will have the same warranty coverage as our other hardware to keep your veteran operation. At Performance by Design, we will do our part to ensure your veteran's success in their program!

If you are interested in our products/services, please call (866) 757-1221.

We have now partnered with MLCC Computer Training and accept 28-1905s, POs, and Purchase Cards.
